

- ①

A diagram of a plant cell. It features a large, irregular green outer boundary representing the cell wall. Inside, there is a large, light blue central vacuole. To the left of the vacuole is a large, dark blue nucleus with a smaller, lighter blue nucleolus inside it. Several yellow, oval-shaped mitochondria with internal folds (cristae) are scattered throughout the cytoplasm. There are also smaller, red, oval-shaped organelles and various small blue and green dots representing other cellular components.

[illegible]
