

- ①

A diagram of a plant cell. The cell is rectangular with a thick green cell wall. Inside, there is a large blue central vacuole. A purple nucleus is located on the left side. Yellow chloroplasts are scattered throughout the cytoplasm. Other organelles include a Golgi apparatus (yellow stack of sacs), mitochondria (red bean-shaped structures), and various small vesicles and lysosomes.

A blank sheet of graph paper featuring a uniform grid of small squares. The grid consists of 20 columns and 15 rows, providing a structured area for drawing or writing.
