

- ①

A diagram of a plant cell. The cell is rectangular with a thick green cell wall. Inside, there is a large blue central vacuole. A purple nucleus with a darker blue nucleolus is located on the left. Yellow chloroplasts are scattered throughout the cytoplasm. A stack of yellow, flattened sacs (cristae) is visible near the top right. Other small organelles like mitochondria and ribosomes are also present.

A large grid of graph paper with 20 columns and 10 rows. The grid is composed of small squares, with a slightly larger margin at the top for writing.
