

AB: Flächeninhalt berechnen (Dreieck)

Mathematik Messen E 5

- ① Berechne den Flächeninhalt folgender Dreiecke auf einem karierten Blatt Papier und nutze hierfür das 4-Schritt-Löseverfahren.

The grid contains the following triangles:

- Aufgabe 1:** A triangle with vertices A, B, and C. The area is to be calculated in a pink box: $A_1 =$ [pink box].
- Aufgabe 2:** A triangle with vertices A, B, and C. The area is to be calculated in a purple box: $A_2 =$ [purple box].
- Aufgabe 3:** A triangle with vertices A, B, and C. The area is to be calculated in a yellow box: $A_3 =$ [yellow box].
- Aufgabe 4:** An inverted triangle with vertices A, B, and C. The area is to be calculated in a light green box: $A_4 =$ [light green box].
- Aufgabe 5:** A triangle with vertices A, B, and C. The area is to be calculated in a pink box: $A_5 =$ [pink box].
- Aufgabe 6:** A large triangle with vertices A, B, and C. The area is to be calculated in a light blue box: $A_6 =$ [light blue box].
- Aufgabe 7:** A triangle with vertices A, B, and C. The area is to be calculated in a purple box: $A_7 =$ [purple box].
