

AB: Flächeninhalt berechnen (Parallelogramm)

Mathematik Messen E 5

- ① Berechne den Flächeninhalt folgender Parallelogramme auf einem karierten Blatt Papier und nutze hierfür das 4-Schritt-Löseverfahren.

The image shows six parallelograms on a grid background, each labeled with a task name and a corresponding area variable to be calculated. The vertices are labeled with letters A, B, C, and D.

- Aufgabe 1:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_1 =$ followed by a pink rectangular box.
- Aufgabe 2:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_2 =$ followed by a purple rectangular box.
- Aufgabe 3:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_3 =$ followed by a yellow rectangular box.
- Aufgabe 4:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_4 =$ followed by a light green rectangular box.
- Aufgabe 5:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_5 =$ followed by a light blue rectangular box.
- Aufgabe 6:** A parallelogram with vertices A (bottom-left), B (bottom-right), C (top-right), and D (top-left). The area is given as $A_6 =$ followed by a pink rectangular box.
