

ÜB: Dezimalzahl in Prozent umwandeln

Mathematik Prozent M 7

- ① **Wandle die Dezimalzahl in einen Bruch und Prozent um.**
Denke daran, die Brüche so weit wie möglich zu kürzen!

Beispiel:

$$0,25 = \frac{25}{100} = \begin{array}{l} \nearrow 25\% \\ \searrow \frac{1}{4} \end{array}$$

a) $0,34 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

b) $0,06 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

c) $0,88 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

d) $0,36 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

e) $0,4 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

f) $0,9 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

g) $0,01 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$

h) $0,56 = \square = \begin{array}{l} \nearrow \square \\ \searrow \square \end{array}$
