

- ① Berechne den Flächeninhalt folgender Dreiecke auf einem karierten Blatt Papier und nutze hierfür das 4-Schritt-Löseverfahren.

The image shows seven triangles on a grid background, each labeled with a task number and a corresponding area variable to be calculated:

- Aufgabe 1:** A triangle with vertices A, B, and C. The area is labeled $A_1 =$ followed by a pink box.
- Aufgabe 2:** A triangle with vertices A, B, and C. The area is labeled $A_2 =$ followed by a light blue box.
- Aufgabe 3:** A triangle with vertices A, B, and C. The area is labeled $A_3 =$ followed by a yellow box.
- Aufgabe 4:** An inverted triangle with vertices A, B, and C. The area is labeled $A_4 =$ followed by a light green box.
- Aufgabe 5:** A triangle with vertices A, B, and C. The area is labeled $A_5 =$ followed by a pink box.
- Aufgabe 6:** A large triangle with vertices A, B, and C. The area is labeled $A_6 =$ followed by a light blue box.
- Aufgabe 7:** A triangle with vertices A, B, and C. The area is labeled $A_7 =$ followed by a light blue box.
